Kim Pham

Graduate Software Developer
kimduong.pham03@gmail.com • (+61) 414196819 • LinkedIn • GitHub • Portfolio

SUMMARY

Enthusiastic Graduate Software Developer with exposure to TypeScript, Python, React/Next.js, and SQL through university projects, internships, and personal work. Strong foundation of web frameworks, APIs, relational databases, and AWS cloud platform with eagerness to deepen skills in building scalable, maintainable applications. Familiar with Git, Docker, automated testing, and Agile development practices. Clear communicator, fast learner, and collaborative team player with a passion for delivering maintainable, customer-focused features.

EDUCATION

Swinburne University of Technology **Dec 2024**
Bachelor of Computer Science, Data Science major *Melbourne, VIC*
GPA: 3.7/4.0 (**WAM:** 83)
Honors: Swinburne International Excellence Scholarship - 50% tuition fee
Relevant Courses: Introduction to Machine Learning, Intelligent Systems, Data Structures and Patterns, Object-Oriented Programming, Cloud Computing Architecture

KEY SKILLS

Languages: Python (Advanced), JavaScript/TypeScript (Intermediate), SQL (Advanced), C# (Basic/.NET exposure)
Frameworks & Libraries: React, Next.js, FastAPI, Prisma ORM, tRPC, TailwindCSS
Databases: PostgreSQL, Supabase, MySQL, Neo4j
Cloud & CI/CD workflows: AWS, Vercel, Docker, GitHub Actions
Testing & Tools: Postman, Git, GitHub
Soft Skills: Clear and confident communication, time management, problem-solving, teamwork, adaptability, eagerness to learn, customer-focused mindset

EXPERIENCE

Software Developer Intern **April 2025 - Present**
Career Mentor *Melbourne, VIC*

- **Designed and deployed** an end-to-end Retrieval-Augmented Generation **(RAG) solution** for sales coaching, integrating **n8n workflows, Meta Webhook, OpenAI API, and Supabase VectorDB**.
- Built a **Chrome browser extension with React, TypeScript, and Vite** to provide seamless daily access, resulting in a **23% boost in sales conversion rates** and **30% faster lead-to-deal closure** within 2 months.
- Enhanced scalability by **reducing new sales assistant training time by 50%**, accelerating onboarding into revenue-generating roles.
- Drove strong adoption, with **80% of sales assistants using AI suggestions daily**, creating measurable improvements in deal close rates and customer experience.
- Collaborated in an **Agile team**, contributing to sprints, code reviews, and iterative delivery of customer-focused features.

Software Engineering Intern **Jan 2025 - March 2025**
Innovation Nexus *Melbourne, VIC*

- **Modeled and optimized databases** with Prisma ORM, improving query performance and enabling smoother API integrations that supported scalable web application development.
- **Collaborated with engineers on schema migrations and performance tuning**, strengthening production data reliability and system scalability for customer-facing features.
- Applied **GitHub for version control** and **Postman for API testing**, contributing to team workflows and efficient debugging.
- **Wrote and reviewed unit tests** to maintain data consistency across endpoints and migrations, improving overall system stability and reducing defects in production.

Business Development Manager **Oct 2023 - June 2024**
AIESEC at RMIT *Melbourne, VIC*

- Led a team of 8 to secure **$1,000 funding and 12 in-kind sponsorships**, doubling flagship event attendance to 100+ participants.
- Managed sponsor pipeline and stakeholder relationships in Salesforce CRM, ensuring accurate reporting and timely follow-ups.
- Streamlined team workflows with FAQs and templates, reducing recurring CRM issues and improving efficiency.

PROJECTS

AI Website Generator | Next.js, Prisma, Tailwind, Inngest, E2B, Vercel

- Built an **AI-powered web platform** generating responsive websites from natural language prompts, **cutting setup time from hours to just 2–3 minutes**.
- Delivered a **deployed full-stack solution** with scalable workflows, real-time previews, and polished UX using **Vercel.**

Pneumonia Image Detector | Python, Pytorch, FastAPI, Docker, Railway.

- Trained a **CNN image classifier model** on chest X-ray data (using Pytorch) and exposed it via a FastAPI backend with simple UI interactions (using **Streamlit)**.
- **Containerized and deployed** the entire application (model, API, UI) with **Docker** on Railway for a production-ready ML application.

Airtable Clone | Next.js, tRPC, Prisma, Vercel

- Built a **full-stack spreadsheet editor** app **supporting 100k+ records with <1s** rendering through virtualised infinite scrolling.
- **Optimised query performance (2.5s → 500ms)** and implemented optimistic UI with conflict resolution for smooth collaboration.

COMPETITIONS

Top 3 Finalists - Beginner Track, MedHack 2025 **Feb 2025**

- Collaborated with a team to build predictive models **(using XGBoost, 1D-CNN, DNN)** on **9M+** simulated vital sign records, achieving **97% accuracy** in forecasting patient crisis status by optimising time series feature engineering.

CERTIFICATES

- **AWS Certified Cloud Practitioner** **In Progress**
- **Google Data Analytics Specialization** **Dec 2023**
- **Hackerrank Intermediate SQL** **Dec 2023**
- **Huggingface AI Agents Course Certificate** **April 2025**
